ORDER NO.

**SUBJECT:**

DOCKET NO. 2008-196-E - Combined Application of South Carolina Electric and Gas Company for a Certificate of Environmental Compatibility and Public Convenience and Necessity and for a Base Load Review Order for the Construction and Operation of a Nuclear Facility in Jenkinsville, South Carolina - Discuss with the Commission South Carolina Electric and Gas Company's Petition for an Order Permitting Commencement of Construction Activities.

**COMMISSION ACTION:**

In accordance with S.C. Code Ann. Section 58-33-110 (7), I move that we grant SCE&G's Petition for an Order permitting commencement of initial clearing, excavation, and construction activities at the site of V. C. Summer Nuclear Station Units 2 and 3, as such commencement is justified by public convenience and necessity. The testimony at the hearing showed that the Company intends to relocate a rail line, to construct or improve roads and a bridge needed to deliver construction equipment, materials, and workers to the site, to perform general clearing, grubbing, and grading, and to perform other general site preparation activities, and that this work is necessary in order to avoid cost increases in the event the project is approved. The Company will proceed with these activities at its own risk. I would also state that, under the statute, our granting of this petition does not, in any way, indicate approval by this Commission of the proposed nuclear generating units.
